

ASSESSMENT GRIDS AS QUALITY MECHANISMS **2016-2017** 2019-2020

St. Xavier's College, Autonomous, Mumbai  
ASSESSMENT OF WRITTEN ASSIGNMENT

Dept. of PSYCHOLOGY Course Code AN/0401  
PSY

DATE: 8/2/20

NAMES OF STUDENTS and UIDs and Roll Nos.

- 1) LEANNE MONTEIRO - 185 - 181039      6) MERLYN ROBY - 254 - 181325  
 2) SUZETTE NETTO - 186 - 181040      7) MITALI GUPTA - 258 - 181332  
 3) VANESSA SEQUEIRA - 199 - 181078      8) ABIGAIL NOKONHA - 262 - ~~181325~~ 181353  
 4) GREATI GEORGE - 248 - 181301  
 5) SHARLENE MENEZES - 249 - 181302

*Skunde*  
*29/1/20*

ASSIGNMENT  
TITLE OF WRITTEN PRESENTATION: THE ROLE OF PHYSICAL ATTRACTIVENESS IN DATING AND MARRIED COUPLES

100 %	ASSIGNMENT	80-100% (17-20Marks)	60-80% (13- 16 Marks)	40- 60% (9/12Marks)	20-40% ( 5-8 Marks)	0-20% ( 0-4 Marks)
60%	CONTENT	Excellent - Impression of wide reading ( research), good knowledge and comprehensive understanding. Evidence of thoughtful input. Ability to critique, Bibliography mentioned. <b>(12) / (11) / (10)</b>	Good <b>(9) / (8)</b>	Satisfactor y <b>(7) / (6)</b>	Poor <b>(5) / (4)</b>	Very Poor <b>(3) / (2) / (1)</b>
30 %	ORGANISATION	Effective Presentation, Logical Format, Clear Statement of Ideas, Relevant Details, sequence of information and ideas could be easily followed <b>(6)</b>	Few Problems <b>(5)</b>	Many problems <b>(4)</b>	Inadequate presentation, Ineffective format, Ineffective Communication of Ideas, Lack Relevant Details – But an attempt <b>(3)</b>	No Attempt to organize <b>(2)</b>
5 %	VOCABULARY	Richness of Vocabulary <b>(1)</b>	Very good range of vocabulary with some errors <b>(1)</b>	Good range of vocabulary with some errors <b>(0.5)</b>	Small range of vocabulary with errors <b>(0.5)</b>	Little or no effort to demonstrate vocabulary knowledge <b>(0.5)</b>
5%	GRAMMAR, SPELLINGS, MECHANICS	Grammar, Spellings, Punctuations Correct. <b>(1)</b>	Very Few Errors <b>(1)</b>	Some Errors <b>(0.5)</b>	Many Errors <b>(0.5)</b>	No effort <b>(0.5)</b>

TOTAL MARKS FOR WRITTEN ASSIGNMENT: 19 OUT OF 20

# THE ROLE OF PHYSICAL ATTRACTIVENESS IN DATING AND MARRIED COUPLES

## INTRODUCTION

Interpersonal attraction refers to the liking or the desire to form a relationship with another person. This is an umbrella term that includes a range of relationships- romantic, intimate or non intimate relationships. Physical attractiveness, which is the degree to which a person's physical features are pleasing, is but one of the factors leading to interpersonal attraction.

With growing interest in this area of social psychology, this research paper focuses on the importance of physical attractiveness among dating and married couples and which couples considers it to be more important. We also bring in gender dynamics- the demographic trends and which sex values physical attractiveness more than the other, or if it's equally important to both.

## MAIN HYPOTHESIS

- **Null Hypothesis:** There is no difference in the role of physical attractiveness between dating couples and married couples.
- **Alternate Hypothesis:** There is some difference in the role of physical attractiveness between dating couples and married couples.

---

## LITERATURE REVIEW

### **A Study Of Physical Appearance And Level Of Attraction To The Opposite Sex.**

On level of attraction the effects of physical appearance between people of opposite sex has been analyzed. Throughout ages it has been observed that physical appearance plays an important role in mate selection. In a research conducted by Sherynn J. Perry in 1998. 57 (19 men and 38 women) university undergraduate students participated who were randomly selected from four psychology classes. The female participants were twice the number of male participants. Majority were Caucasian, 4 % were American Indian and 2% were Hispanic. They were asked to view a stimulus person followed by answering questions based on stimulus' attraction level and how willing they would be to participate with that stimulus in various activities.

The researcher distributed the questionnaire in the classroom setting. Men and women were given subjects of opposite sex and the time limit was 10 minutes. The experimenter made use of reverse scoring technique on questions that had to do with characteristics other than physical appearance in order to record the emphasis placed on physical appearance.
